

Are you looking for investment in wastewater solutions sector in India?

Are you willing to invest in a seed stage start up by IIT Graduates?

Do you wish to be a part of a team which is driver by passion and motivation?

Do you want to guide a budding company as it grows in the coming years?

Does a mix of products, technology solutions, R&D and consultancy appeal to you?

If you can connect to any of the above questions, Canopus India is just the start up which can promise you good returns on investment. We are looking for angel and early stage investors who are willing to make equity based investment in the company

Key features.....

At Canopus India we understand the sentiments of owners of Small and medium scale enterprises. The thrust of our services and product has been to be client centric. Our business model is designed to help SMSE's to lower their cost and give customised solutions to each of the unit. We help clients to realize nuances of manufacturing process and understand, a lot of value can be generated from the same. We specialise in low volume waste water treatment plants and constantly strive to ensure Low operational cost, energy sustainability and low pay back period.

A bunch of young engineers of IIT looking to build a sustainable environment at small and medium scale enterprises level, we believe they are the backbone of the economy and need engineering consultancy to excel.
